STORAGE

CREATE CHANGE

Basic needs in the workplace remains more or less consistent over time. However, the design and layout of the workplace are in constant change. Temporary projects, new colleagues or new ways of working are all key drivers in an increasingly changing environment.

Therefore, we have created a furniture system with high flexibility that enables change. The different modules can be combined in various ways to fit the current needs and can easily be reconfigured when the demands shift.

All modules can be reconfigured without causing damage or leaving marks. Everything is easily affixed by the smart pattern of holes as well as the frames which are the foundation of the system. This results in a strong, stable and flexible construction facilitating change.

Jonas Forsman
DESIGNER · EFG CREATE

CREATE SPACES

EFG Create is designed using thin and distinctive lines. Since the parts are “simple” separately, they combine perfectly in larger configurations and layouts. The thin dimensions are also selected to ensure we’re not using more material than absolutely necessary, without compromising stability or practicality.

The system allows you to create “open” and “closed” walls for use as room dividers as well as areas for increased privacy and / or collaboration.

CREATE STORAGE | MODULES

With EFG Create it is easy to create storage solutions that meet your personal needs and preferences. All of the modules can be configured vertically, horizontally or in angles, depending on what function or expression you're after.

CREATE PERSONALITY

We want you to make your workplace as unique as possible. Therefore, when you choose modules from EFG Create you are presented with a number of different standard colors, material and surfaces to experiment with. And if you're looking for an even more customized look we are also able to tailor make most colors.

METAL WALLS

MDF MODULES

FRONTS AND TOP BOARDS

WOODEN TRAYS AND BOXES

CREATE DETAILS

THE PIERCED PATTERNS on top add a decorative touch to the module and facilitate assembly - vertically, horizontally or in angles.

THE METAL WALLS add character and functionality.

THE DECORATIVE ELEMENT marks where you push to open the doors.

THE FABRIC COVERED WALLS can be upholstered in any of our standard fabrics and contributes to the room both acoustically and as a colour element.

THE WOODEN TRAY is just as much a practical feature in the room as a small design statement.

THE ADJUSTABLE FEET are easy to regulate in order to fit uneven surfaces.

EFG (European Furniture Group) is a leading European supplier of flexible interior solutions for offices and public environments with added values that build image and increase performance. EFG meets unique demands and needs by offering a complete range of furniture with design, sustainability and flexibility in focus. EFG is represented all over Scandinavia and in major parts of Europe.
